Subject: RE: Draft TD for Deschutes TMDLs

Hey Chris – Thanks for the feedback! I'm about to send a slightly revised version to Jayne so she can share it with the contractor. I deleted some comments that we can discuss more internally. I had a question about what you meant by this comment:

(b) (5)

Could you explain more? Feel free to call me if it's easier that way.

Thanks,

Miranda Hodgkiss

Good Morning U2,

Attached are my thoughts. Looks good, very thoughtful. If you want to dive further into the weeds (b) (5) let's schedule a meeting? Happy to help out in whatever way makes sense. :) Copying Dave as Dan asked me to stay engaged a few months ago (closing the loop de' loop).

Subject: Draft TD for Deschutes TMDLs

Hi Chris and Ben,

I've put together this draft technical direction for a contractor to work on the Deschutes TMDL revisions. I've struggled with how much information to put in there. Feel free to let me know if it is too much or too little. And particularly if there is something critical missing for the modeling tasks. I will leave it to the two of you to figure out who can review this, or if you would both like to provide input. Would it be possible to get some feedback a week from today (7/20)?

(b) (5)

And then last, I also need to talk more about this with Dave, but do you think there is a possibility of getting one of you involved longer-term to be a co-technical lead with me to help out with the model review?

Thanks for your help!
